

A photograph of a computer lab with several rows of desks. Each desk has a computer monitor, keyboard, and mouse. The monitors are turned off and the room is dimly lit. The text is overlaid on the image.

# Parts of a Computer

Group 6 Mouse/Touchpad, and Modem

Damani, James, Shoshana, and Xoe

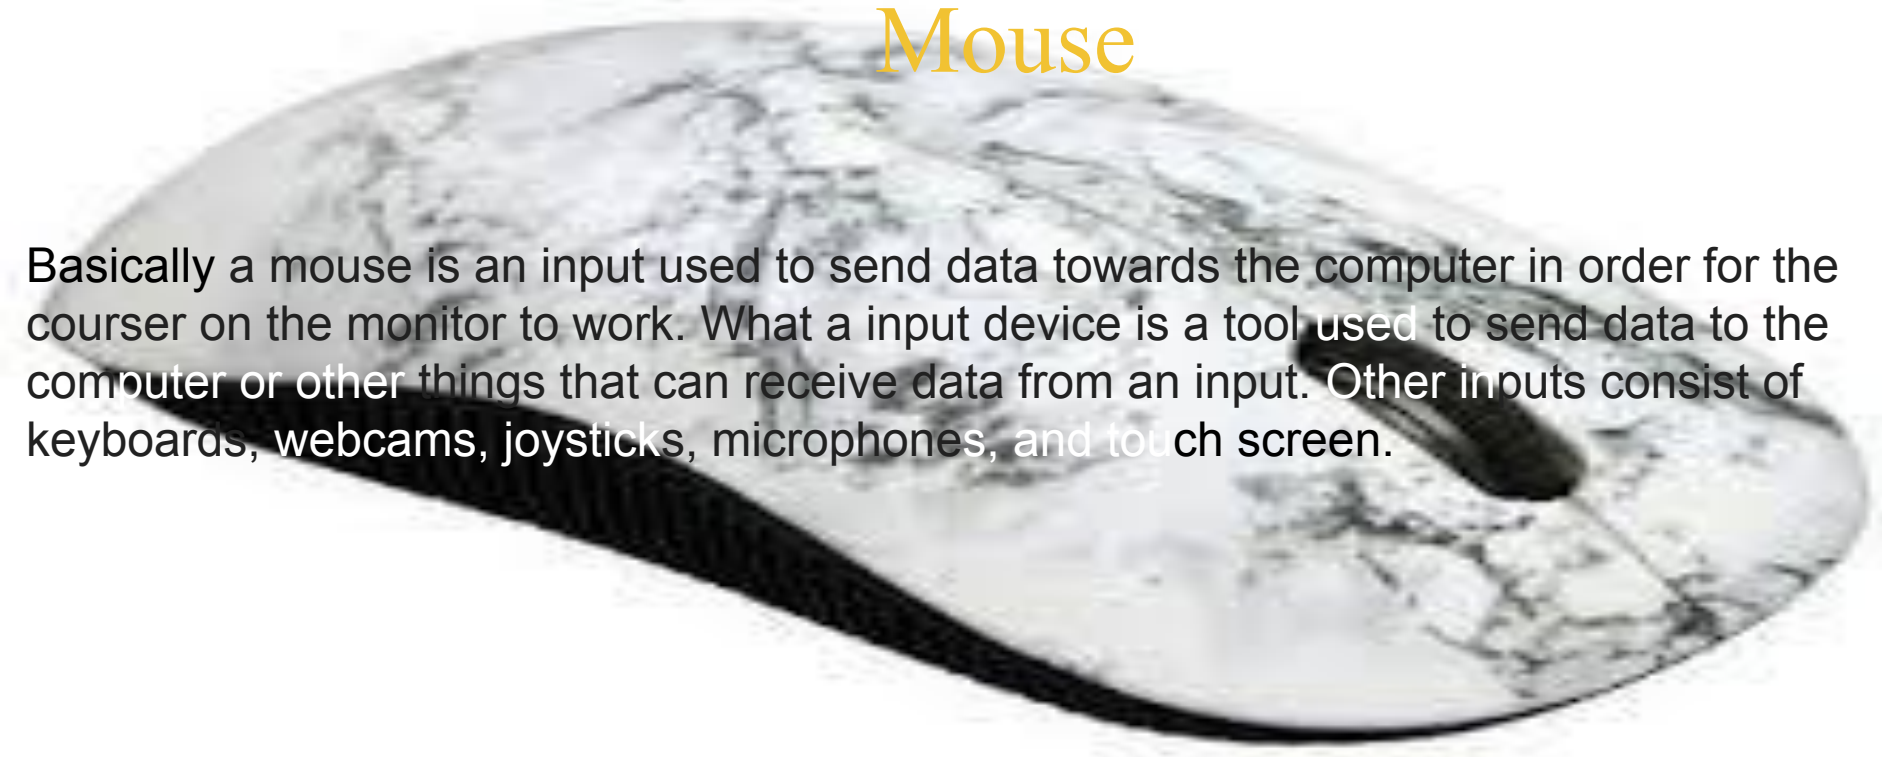

# Touchpad

A Touchpad is a device for pointing controlling input positioning on a computer display screen. It is an alternative to the mouse Originally incorporated in laptop computers, touch pads are also being made for use with desktop computers. A Touchpad works by sensing the user's finger movement and downward pressure.

# Mouse

Basically a mouse is an input used to send data towards the computer in order for the cursor on the monitor to work. What a input device is a tool used to send data to the computer or other things that can receive data from an input. Other inputs consist of keyboards, webcams, joysticks, microphones, and touch screen.

# Modem

A modem is typically used to send digital data over a phone line. The sending modem modulates the data into a signal that is compatible with the phone line and the receiving modem demodulates the signal back into digital data.
